### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

The instant invention is deemed to be an unobvious improvement over U.S. Patents 6,079,208, 6,195,993, 6,195,994. The referenced patents each disclose a master cylinder, for use with a pneumatic brake booster, having a main piston, an axial bore, at least one sealing means, a rear supply chamber, a front pressure chamber. Wherein the main piston includes at least one main valve shutter, a first and second rear end. The improvement includes an isolation means, between the reaction chamber and the front pressure chamber, including; a hydraulic isolation valve shutter independent of the reaction piston, and a flow restricting means.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
